Acronym interpretation

PI Price is determined by calculation

Numeric marks interpretation

[1]The price of the service consists of labor hours costs which is determined as a result of the number of worker-hours needed to provide the service, and the avreage cost of working hours. Number of worker-hours was determined as a result of the number of workers required for the service and the number of hours that each worker spent for the execution of the services. (Article 8. paragraph 3. of the Methodology for the determining the price of non-standard services for gas transport, distribution and storage and the public service of gas suply.

[2] The cost of services are borne by the claimant on the quality of gas only if the applicant 's complaint is unfounded. The service does not include the costs of testing by an authorized person (Article 66 of the Storage code).
